

## SYNAETHERIC FARMS

We are two entrepreneurs interested in restoring , assisting the earth biome by following the traditional principles of Permaculture, Polyculture - integrating Perennials, Annuals, Shrubs, Vines, Fruit trees, Nut trees, Beekeeping -Pollinating flowering plants, Fixers, Fungi, Ornamental, Deciduous woods/Forests, Medicinal Plants/Adaptogenic herbs within a Syntropic geometrical layout similar to nature's spirals, employing ancient methods of Electroculture, Magnetoculture with the help of charged water that has vigour , implosive force that reinvigorates the growth of seeds, life on the soil microbiome without utilizing any tilling methods, integrating livestock but not over grazing/intensive animal husbandry depending on select zones of the plot. While traditional tilling/ Weeding/Herbicides/Larvicides/Fungicides/Pesticides/Insecticides are all avoided to let nature self assemble by the least obstruction in its growth cycle naturally fixing the topsoil & subsoil except for accelerating certain stages of Germination- Growth stages-harvesting- frost prone periods by on-site Compost Tea, naturally concentrating earth's abundant Infrared radiation/Telluric current/Paramagnetic effects + Moon cycles/Astronomy to enhance the limitless potential of the living systems. Whereby extending the growing season by another 2-3 months in carefully designed Greenhouses powered by Passive Solar/Geothermal/Thermophilic bacteria/Convection systems/Earth Batteries + Novel Wood based TENG-Triboelectric Nanogenerators which provide/harvest energy with Snow/Vibrations/that can be utilized to power the facility as well as grow in-house Tropical biome fauna-flora in temperature regulated seasonal open-closed loop Dome environments all year around self sustainably. All of this will be digitally assisted by IOT devices, with meticulous inspection from germination - nurturing seedling - mature plant to view how the ecosystem operates with the data being recorded by modern Quantitative and Qualitative(BioEnergy-Field) scientific instruments merged with ancient Alkhemy of Ayurveda & Spagyrics , Biodynamic farming in mind + spirit + body = Practically forging an intimate connection between the micro-cosmic rhythms and patterns of Nature down here on Earth. "As above, so below" ; coupled with new research of Green synthesis approaches in Nanotechnology in creating harmony/solutions at the same time providing prosumers nature's fruits in the purest form with complete transparency of sourcing raw materials from farm to plate by recording the full life cycle of alchemical transmutation into the final product, nourishing the soul of the individual. Lastly we intend to deliver everything with accountability by end-to-end global traceability from seed to plate to recycling the food be implemented by the state of the art Blockchain (Public verifiable ledger) supply chain following GS1 Global Traceability Standard (GTS) and ISO 22005 Traceability in the feed and food chain and ISO 10377 Consumer product safety. All related historical and provenance information for each of the ingredients/components related to a specific asset or product is available to the current owner and can be proved, viewed and analyzed. This functionality also provides a user-friendly way of viewing the complete product DNA tree of a product, verifying each ingredient/component in the life cycle. To gauge the wholistic Earth Core-Bio-noosphere well being as we are the core of it all. Humanity can destroy , but at the same time Humanity is tied to creation and alignment with Nature. Our goal is synthesising all realms of non-physical phenomena and vital force fields to tether the internal ancient wisdom in this current timeline by observing Nature.

As we are two citizens from India & France buying 'Agricultural' Land in the Federation requires 51 % Russian Participation. This is done legally by setting up a 'LLC' with the current lawyers (Herman & Smith) who we are in correspondence with for the past month. The registration requires a Director of Russian origin to process. When the company starts business activity the Director

earns RUB 21,000 + taxes RUB 6342. We are looking for a person who is interested to help (Be part of the 51 % ownership of the land we already found in the Altai Krai/Republic border region + be a director for the short or long-term.) in our eco-venture, our goals/ethos are about ecological homeostasis ,research (My associate is a keen anthropologist + myself continuing research in Energy solutions in Nanotechnology) finding lost information of the sacred land and preserving, creating a community of conscious beings who are aligned with nature. As we are passionate, caring , empathetic individuals the first quality we look for is trust. The right energy and trust to work together creates an environment for growth and learning. We hope to hear from you soon.

[hugosomeguy@protonmail.com](mailto:hugosomeguy@protonmail.com)

We would appreciate an expedited answer since the current situations are hectic for each of us in France and India respectively. We would be forever grateful for your help. Thank you.
