Summary:

Dedicated and highly motivated Cybersecurity professionals with a strong with a strong passion for artificial intelligence and its applications in enhancing security measures. Possessing comprehensive knowledge of cybersecurity principles, risk management and thread detection, I am committed to staying at the forefront of evolving technology trends.

Technical Skills:

- **Python –** Django, Tkinter, Socket, Threading, Numpy, Pandas
- **Pentesting –**Web Security, Nmap, Metasploit, Api, Gobuster
- **Frontend –** React, Html, CSS, Javascript
- **Other –** MySQL, Mongodb

Projects:

TheCyberHub (Open Source):

I proudly highlight my significant open-source contributions to TheCyberHub GitHub repository. One notable project involves the creation of a dynamic web page using React, designed to facilitate the generation of reverse shell code. This initiative not only demonstrates my proficiency in modern web development technologies but also highlights my commitment to advancing cybersecurity knowledge and tools within the open-source community.

YouTube Clone:

A YouTube clone using React and MongoDB. This project is a testament to my expertise in front-end development with React, as well as my skills in integrating and managing data with MongoDB on the back end. By developing a functional YouTube clone, I have demonstrated my ability to create complex, responsive user interfaces while effectively utilizing a robust database system for content storage. This project not only highlights my proficiency in the MERN (MongoDB, Express.js, React, Node.js) stack.

Education:

Theem College of engineering (Boisar): BTech CSE(AI/ML) – (2021-2025)
